

Updates from the Classrooms

In 4K / K we are learning about school routines and how to play with our friends. We are learning how to use the materials in our morning tubs and our STEM bins. We read the story Chick Chicka Boom Boom and made our own Chicka Chicka tree with our names. Next week we will start ABC bootcamp. We also learned what it means to persevere. In religion we are learning about creation.

4K and Kindergarten

Third grade was happy to start the year with some birthday celebrations. Try a second verse to "Happy Birthday" that we sang. It includes the whole Holy Family--***May the Dear Lord Bless you, Shower graces on you, St. Joseph protect you, Blessed Mother guide you.*** (May the Holy Family be everyone's constant help.) Along with 2 classmates and a teacher, we have Our Blessed Mother's birthday. **Happy birthday Dear Blessed Mother Mary!** In honor of Mary's birthday, we said our *Hail Mary* prayer everyday, and we created a small paper "statue." We discussed how we hope to be like beautiful shining jewels for Mary's crown by our kind words, good deeds and thoughts. As we try our best to do God's will, pray everyday, and love God and all people, we hope to become those future saints. Blessings

Third Grade

What we're learning in Grade 3 and 4 Science this week! This week we learned about flowers: what they do for the plant, how they work, and more. We solved the mystery, "Why do plants grow flowers?" (It's to attract pollinators!) You can help reinforce this week's learning by asking your child to find a flower in the house, yard, or neighborhood. Ask your child, "What has to happen, in order for this plant to grow seeds?"
