

COVID-19 Quarantine Options Timeline

Note: Shortened quarantine options may not apply in some settings or situations. Follow local and institutional quarantine guidance. Additionally, people who have tested positive for COVID-19 within the past 3 months and recovered do not have to quarantine or get tested again as long as they do not develop new symptoms.

Continue to monitor your symptoms, wash your hands, watch your distance, & wear your mask.

Per the Centers for Disease Control (CDC) & Wisconsin Department of Health Services (WI DHS), vaccinated persons with an exposure to someone with suspected or confirmed COVID-19 are not required to quarantine if they meet all of the following criteria:

- Continue to be symptom-free after exposure to a positive case
- Exposure happened at least 2 weeks after completing the full vaccination series****

*With a negative test result
**Released on Day 8
***Released on Day 11
**** Series may require one or two doses depending on vaccine.
